36" (914mm)

48" (1.2m)

60" (1.5m)

72" (1.8m)

*Custom sizes
available.*

CAB Tubes greatly improve visibility and safety when marking low roof, hazard areas, unsupported roof, etc. Tubes can also be slid over rods for marking haulage roads and unload areas.

Eleven different colors available on tubes. Colors may be used alone or in combination with another on individual tubes. Striped tubes have reflective bands alternating with sections of black non-reflective tubing. Solid tubes have reflective bands adjoining each other to provide a solid reflective surface.

Made from lightweight, durable 1-1/4" (32mm) diameter thin wall black tubing covered with microprism retroreflective vinyl. Has exceptional brilliance and true colors for marking and identification. Smooth reflective surface won't impregnate with dust and dirt like other reflective materials. Can be wiped clean to restore brilliance. Tubes may be hung vertically with 1 grommet or horizontally with no grommets or 2 grommets. Optional S-hooks available for faster installation. Packaged 50/box. Standard lengths listed above.
