

Hawiflex® welded sheets: Quick assembly – strong connection

The Hawiflex® welded sheets with preconfigured welding points allow a rapid high-strength welded joint, e.g. as lining for drums, silos, tanks. Fastening is done at welding points (12 per m²). The weld holes are closed quickly and permanently with plugs. And because there is no protrusion here, there is no need for reworking either.

Dimensions:

1000 x 1000 x 15 mm,
1000 x 1000 x 25 mm
and on request

Tip:

This keeps expensive components undrilled
